

HAND TOOL HEATER

GENERAL

The hand tool heater is a device for heating up the hand tools gently and efficiently. The special design is for RME hand tools and has 2 gas burners, one on each side. All RME hand tool sizes fit in the larger heater. The smaller (more narrow) fits all but the 50cm wide tools. The smaller version fits on a hand application truck next to the preheater in the rear. In the bottom excess thermoplastic material is collected in a recycle bin to be re-used.

TECHNICAL SPEC.
